New Yoss, September 5.
The Herald's Chattenoga correspondent says that since Colonel W. B. Gaw, of the 16th colored infantry, took command of this post, the Augean stable is being renovated. The arrest and conlinement of several officers for drunkenness and a promulgation of an order forbidding the sale of liquors to officers or soldiers, have had a salutary effect. As Chattanooga is one of the five permanent fortresses of the United States it is evidently desirable that strict order and military discipline should at once be inaugurated, and that vice in every form should be discouraged. This onel Gaw has done.

The colored soldiers of the Colonel's regi-ment are all picked men, formerly of the engineer corps, embracing mechanics of all kinds, who can construct anything from the simplest article of mechanism to a tryers track for a one hundred pound gur.

The Colonel is an experienced engineer,
he constructed batteries at cape Girardeau,
Island No. 10, and other places in the
early part of the war. This makes both

the commander and soldiers eminently fitted for the command here, where guar Chattanoogs presents a lively military

The Herald's Washington special says it is stated to-day on good authority that charges and specifications are being pre-pared on which to bring to trial a Captain in the army who has been on duty for several months in the city of Alexandria. It is generally understood that the accused will be held to answer for grossly inhuman treatment of private soldiers, and also for resorting to manifold devices for impressng men into the service as deserters, and collecting a bounty of thirty or forty dollars therefor, paid by the government for restoring deserters. The government does not intend to confine its prosecutions for abuse of soldiers to men of the rebellious forces alone, but will hold to accountability the Federal officers who have been actual ed by a passion. The case will proparty be brought for trial before the military commission now setting at the Old Uspi-tol, of which Major Shifter is Judge Ad-

BALEIGH, September 4. Judge Carter, who has returned from as extensive trip through the South, states that the crueity to the freedmen, and the frequency of homicides among them by the whites, is increasing to a fearful extent, especially in places where the troops are be-ing removed. The Judge has a copy of the Southern Sun, which says: If the Yankees are alarmed at the killing of a few hundred niggers a day in States where they are protected by Yankee troops to a certain extent, what will be their slarm after the departure of the military forces, and the readmission into the Union of these States as sovereign powers, who will then have complete organization of the militia in each county, which will give the South a second army that will bid defiance to the world?

The high station, the great ability, and the important public services of the departed Governor, render such a tribute upon this occasion eminently proper.

Considerations personal to the member of the Court who is responding to the motion before us, make the performance of this duty a grateful, though melancholy office. For a period reaching back to the first entrance of the decessed into public life, as a member of the Legislature, and extending down to his last illness, there was a constant interchange of kindness between the parties. The recorded history of the past, and the The recorded history of the past, and the developments daily occurring around us, are full of instruction upon this subject. In the power of application to work, Governor Brough has rarely been surpassed. Those who are aware of his habits in the Executive office at Columbus, knew that his hours of labor were limited only by the work he had to do. Not unfrequently the gray of the morning found him at his table, apparently untited and indefatigable. Many believed that he thus sowed the seeds of that terrible disease which grow until it.

Many believed that he thus sowed the seeds of that terrible disease which grow until it ripened in his dissolution.

Nothing in his life was more remarkable than his fidelity to the trusts committed to his charge. Many years ago a distinguished banker in one of the Esstern cities remarked that "Auditor Brough had that rare quality—efficial avarice." He added, "he is as avaricious for the State as any one can be for himself, and he is the only person I ever knew, who exhibited that trait of character."

In all the contests—personal and political—through which he passed, no one ever

LOUAL NOTIUES. A Timely Warning to the Sick.

It is especially important at this time, when th narkets of the United States are dooded with the direct poisons, under the name of imported liquors and when domestic compounds purporting to be medicinal, but not a whit less pernicious, are her aided to the world as "sovereign remedies," that the public should fully understand the facts. Be it known, then, that while all the diffusive stimu lants called Liquors are impure, and all the Toxic containing alcohol are manufactured with a flery article containing amyl or facel oil, a mortal poison HOSTETTER'S CELEBRATED STOMACH BIT-TERS contain none of these things, but a comoinstion of pure essence of Bye with the pure juices of the most valuable stomachic, soil billous, and aperient herbs and plants, and that as a cufe and rapid remedy for Dyspepsia and all its kindred complaints, this preparation stands before the world without a rival or competitor. Its sales today are equal to the combined sales of all the other tonics advertised to the United States, and the ertificates which authenticate its usefulness are signed by individuals of the highest standing in every professional calling and walk of life.
